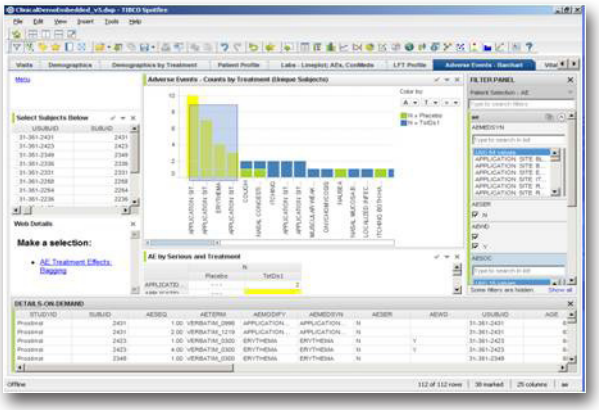
TIBCO Spotfire® Clinical

TIBCO Spotfire® Clinical enables clinical development team members to build robust analytic solutions using data from multiple disparate clinical development systems. The powerful, intuitive interface enables the business user to develop solutions without delays and the strain on biostatistics and IT resources.

TIBCO Spotfire® Clinical enables clinicians and managers who use Oracle® Clinical and Oracle® Remote Data Capture at pharmaceutical, biotechnology, medical device, and contract research organizations to leverage Spotfire software's powerful in-memory analysis, predictive modeling and highly visual and intuitive interface to rapidly explore clinical data, helping identify key insights to get drugs to market faster.

TIBCO Spotfire® Clinical including Spotfire interactive visualization and S+/R predictive analytics enables proactive, responsive decision making, rather than retrospective tracking of results. Such proactive decision making can shorten the time between critical development gates and enable key milestones to be met sooner, while simultaneously managing safety risk.



Easily perform in-stream monitoring of complex clinical and operational data via identification of outliers on graphical displays and drill-down to patient level data.

AT A GLANCE

In order to reduce costs, maintain market share and increase revenue, pharmaceutical, biotechnology and medical device companies face increasing pressure to bring new drugs to market in the shortest possible time. Spotfire analytics addresses these challenges by enabling actionable decisions that enhance patient safety, streamline operations and enable faster product launches leading to better medical outcomes for the patients and financial outcomes for the life science industry.

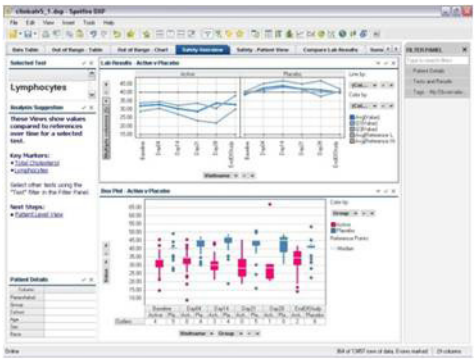
BENEFITS

- Fast medical & safety review of clinical data
- Identify protocol violations, enrollment issues and drop-out issues early
- Decrease manual listings and associated processes
- Prepare interim analyses and manage trial adaptations including dosing adjustments
- Identify relationships in data and rapidly assess data quality

TIBCO®
The Power of Now®

ATTRIBUTES & CAPABILITIES

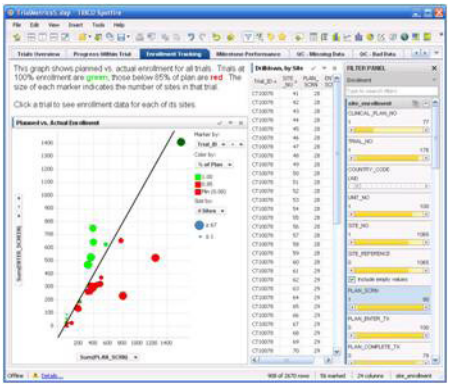
Safety & Pharmacovigilance Analysis
Detect, assess, and understand adverse events leading to better prevention by integrating with various signal detection systems to mitigate risk associated with ongoing clinical studies

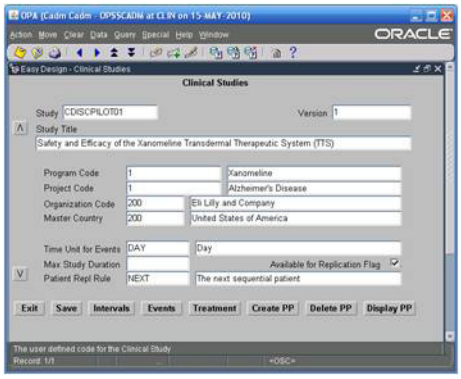


Perform efficient internal safety review meetings by interacting with and performing analysis on live safety data

Clinical Analysis Platform
Easily integrate data from various clinical development systems to provide a centralized view of clinical, operational, and safety data enabling instant insight into your clinical studies. Utilize existing visualization templates to get up and running quickly.

Clinical Operations and Resource Management
Optimize site management in order to identify and retain best performing sites





Connect to Oracle Clinical® views and load the data directly into Spotfire for exploratory visualization and analysis

TIBCO Software Inc. (NASDAQ: TIBX) is a leading independent business integration software company and a leading enabler of real-time business, helping companies become more cost-effective, more agile and more efficient. TIBCO has delivered the value of real-time business, what TIBCO calls The Power of Now®, to thousands of customers around the world and in a wide variety of industries.
